Professional Summary

Full Stack Developer with 4 years of experience building scalable web applications using the MERN stack. Skilled in developing responsive user interfaces, designing REST APIs, and integrating AI-powered features using OpenAI API. Proven ability to improve application performance and deliver user-focused solutions in collaborative environments.

Work Experience

Software Engineer

Innovative Code Labs Pvt. Ltd.

Mar 2023 – Present

- Built and deployed 10+ scalable web applications using MERN stack
 - Developed REST APIs improving response time by ~30%
 - Integrated OpenAI API for AI-driven features in production applications
 - Optimized frontend performance, reducing load time by ~25%
 - Collaborated with cross-functional teams to deliver high-quality solutions
-

Software Developer

Trikara Technologies Pvt. Ltd.

Sep 2022 – Mar 2023

- Developed and maintained full-stack applications using React and Node.js
 - Built reusable UI components to improve development efficiency
 - Designed backend APIs and handled database operations
 - Contributed to 3+ client projects with end-to-end delivery
-

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS

Database: MongoDB, PostgreSQL

Mobile: React Native, Expo

Cloud & Tools: AWS, Firebase, Vercel, Heroku, Railway

Integrations: OpenAI API, Stripe, Algolia

Version Control: Git, GitHub

Projects

Echo AI – AI Powered Conversational Platform

<https://echo-ai.nxtgenaidev.com/>

Tech Stack: React.js, Node.js, Express.js, MongoDB, Express.js, REST APIs, AI Integration

Description:

Developed an AI-powered conversational platform using MERN stack architecture with intelligent chat workflows, scalable backend services, authentication systems, and AI-driven automation capabilities.

Key Responsibilities:

- Developed responsive frontend components using React.js
 - Built REST APIs and backend services using Node.js and Express.js
 - Integrated AI-based conversation workflows and automation features
 - Implemented authentication, user management, and database operations using MongoDB
 - Optimized application performance and scalability
 - Collaborated on full-stack development, API integration, and deployment
-

Elevence AI – AI Powered Platform

<https://www.nxtgenaidev.com/products/elevence-ai>

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, AI Integration

Description:

Developed an AI-powered full-stack platform using MERN stack architecture, focusing on scalable backend services, responsive frontend development, AI workflow integration, and performance optimization.

Key Responsibilities:

- Developed responsive frontend interfaces using React.js
 - Built scalable backend APIs using Node.js and Express.js
 - Designed and managed MongoDB databases and schemas
 - Integrated AI-powered workflows and automation features
 - Implemented REST APIs, authentication, and data management
 - Optimized application performance and scalability
-

Pallet Rack Market - Logistics & Pallet Tracking Platform

 <https://pallettrackdev-a27ce23e7fa2.herokuapp.com/>

Tech Stack: React.js, Node.js, Express.js, MongoDB/PostgreSQL, REST APIs, AWS, Heroku

Description:

Developed a full-stack logistics and pallet tracking platform to manage inventory movement, shipment tracking, user workflows, and operational processes through scalable web architecture.

Key Responsibilities:

- Developed responsive frontend interfaces using React.js for tracking and management workflows
- Built scalable backend APIs using Node.js and Express.js for inventory and logistics operations
- Implemented authentication, role-based access control, and user management systems
- Designed and optimized database schemas for tracking records and operational data
- Developed real-time tracking workflows, reporting features, and dashboard functionality
- Integrated REST APIs and optimized application performance for high-volume operations

- Managed deployment, maintenance, and cloud hosting workflows for production environments
-

Global Family Home Rentals

 <https://gfhr-dev-c7212ab00a8a.herokuapp.com/>

Tech Stack: React.js, Node.js, Express.js, MongoDB/PostgreSQL, REST APIs, AWS, Heroku

Description:

Developed a full-stack accommodation and travel platform focused on long-term family travel, property listings, booking workflows, membership management, and user experience optimization. The platform enables families to discover, manage, and access travel accommodation services digitally.

Key Responsibilities:

- Developed responsive frontend interfaces using React.js for property listing and booking workflows
 - Built scalable backend APIs using Node.js and Express.js for user management and platform operations
 - Implemented authentication, membership management, and role-based access systems
 - Designed and optimized database structures for listings, bookings, and user workflows
 - Developed booking management, dashboard functionality, and API integrations
 - Improved platform performance, scalability, and deployment workflows
 - Worked on full-stack development, cloud deployment, and production maintenance processes
-

Education

Masai School, Bangalore

Full Stack Development (2022)

AN College, Patna

B.Com (2019) – 79%

SM College, Bhagalpur

Commerce (2015) – 73%

New Horizon School (CBSE)

(2013) – 88%

Strengths

- Problem-solving mindset
- Quick learner
- Self-motivated
- Strong ownership and adaptability
